Re Item V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

- V.1. Reference is made to the following documents:
 - **D1**: PATENT ABSTRACTS OF JAPAN vol. 011, no. 050 (M-562), 17 February 1987 (1987-02-17) -& JP 61 213529 A (MATSUSHITA SEIKO CO LTD), 22 September 1986 (1986-09-22)
 - **D2**: FR-A-2 349 105 (RIELLO CONDIZIONATORI GIORDANO) 18 November 1977 (1977-11-18)
- V.2. The amended **claims 1-9** filed with the fax dated 30.06.2004 fulfill the requirements of Article 34(2)(b) PCT and therefore they substitute the originally filed claims 1-8 and are incorporated in the application.
- V.3. The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of **claim 1** is not new in the sense of Article 33(2) PCT.
- V.3.1. The document **D2** discloses (the references in parentheses applying to this document);
 - a condenser unit (38) crossed by an external air flowing trough an inlet (20, 22) and an outlet (20, 22);
 - an evaporator unit (36) crossed by an internal air flowing trough an inlet (16, 18) and an outlet (16, 18), wherein;
 - said condenser and evaporator units are aligned one behind the other (see figure 3) according to an axis parallel to the direction of the external inlet and outlet (20, 22), said inlet (20, 22) and outlet (20, 22) being placed in a substantially horizontal plane and said inlet (20, 22) and outlet (20, 22) consisting of two holes (cf. D2, page 5, line 34 page 6, line 19 and figure 4).
- V.3.2. All the features of **claim 1** are disclosed in **D2**, also the external inlet and outlet holes (20, 22), whose shape is not specified. Therefore **claim 1** cannot be considered new in the sense of Article 33(2) PCT.
- V.4. Dependent **claims 2** does not contain any features which, in combination with the features of any claim to which it refers, meet the requirements of the PCT in

WRITTEN OPINION SEPARATE SHEET

respect of inventive step, for the following reasons:

- V.4.1. Although in document **D2** the shape of the external inlet and outlet holes is not explicitly specified, the circularity of the shape of at least one of the holes is anticipated, as shown in figure 4 (the external hole (22) surrounds the fan (32)).
 - The circular shape of the external inlet and outlet holes is merely one of several straightforward possibilities from which the skilled person would select, in accordance with circumstances, without the exercise of inventive skill.
- V.5. For the newly filed dependent **claims 3-9**, corresponding to the originally filed claims 2-8, are still valid the objection arisen in paragraphs 2., 2.1., 2.2., 2.3. of the examiner's communication dated 01.04.2004.
